

Safer Pedestrian Facilities for Victoria Quarter

We are running a petition asking for safer walking facilities for Auckland City Centre's nearly 20,000 residents living in and around the Victoria Quarter (the area bounded by Victoria, Hobson and Union Streets).

The Problem

This highly urbanised area is dangerous and unpleasant for its many thousands of residents and visitors, especially the young and the old. The poor environment reflects an ongoing lack of care and interest in these residents' needs by various levels of local and national government.

Please sign to support the residents of this growing inner-city community in having their basic safety and movement needs met.
